## Articles by month

### January

Article title	Pg.	Dept.
A rose by any other name .....	7	ED
Definitions—quest. 17-22; Article 100 .....	13	QC
Prismatic glass reflectors .....	34	WS
What you should know about poleline equipment .....	55	F
Upsizing a 35kV plant service in 12 hours .....	63	F
The materials and makeup of Type MV cable .....	71	F
Protective relays .....	79	F
Oil circuit breaker maintenance .....	88	PM
UG splice modules simplify downtown rework .....	88	PM
Aerial ladder fits on standard van .....	92	PM
Energy bills cut at SDSU library .....	93	PM
Lighting controls provide savings .....	96	PM
What is transformer percent impedance? .....	98	RQ
Grounding multiple service disconnects .....	108	CF
Continuous lighting loads .....	108	CF
Enclosures for classified areas .....	110	CF
Rigid nonmetallic conduit under a slab .....	111	CF
Lighting is still an underachiever .....	140	AI

### February

The NEC covers computer power work! .....	7	ED
Closed-loop and programmed power distribution—quest. 1-7; Article 780 .....	16	QC
Protecting motors against running overcurrent—part 1 .....	34	MF
Fault protection for digital multimeters .....	42	WS
Effective preventive maintenance serves automated plant .....	49	F
Practical field tests assure power cable reliability .....	58	F
Servicing solid-state circuit boards .....	66	F
Electrical hot work safety .....	73	F
Luminaires offer good color rendition for cars .....	81	PM
Hotel renovation chooses ceiling heat system .....	81	PM
Lighting system helps athletic complex .....	84	PM
Are zero-speed switches really necessary? .....	92	RQ
Installing an "unlisted" lighting fixture .....	96	RQ
Multiple motors on one contactor .....	112	CF
Heat-pump disconnects .....	112	CF
Grounding transformer neutral .....	114	CF
Wiring kitchen countertop receptacles .....	114	CF
Air-conditioner disconnect .....	116	CF
Why nickel-cadmium batteries have gotten a bad rap .....	154	AI

### March

Help us celebrate .....	7	ED
Floating buildings—quest. 1-8; Article 553 .....	12	QC
Protecting motors against running overcurrent—part 2 .....	32	MF

Article title	Pg.	Dept.
AC versus DC testing of cables .....	36	WS
Electrical ideas in a multimillion-dollar residence .....	59	F
Telephone wiring in residential occupancies .....	69	F
Protecting molded-case circuit breakers .....	76	F
SF <sub>6</sub> gas-pressurized cable and conduit system (Type IGS) .....	80	F
HPS lighting system lights new facility .....	86	F
Insulator coating ends flashovers .....	90	PM
What's wrong with this 3-way switch circuit? .....	102	RQ
Fiberoptic cables in manholes .....	108	CF
Switching 208V lighting .....	108	CF
Store sign outlets .....	112	CF
Fire-alarm systems and the electrical contractor .....	138	AI

### April

Who'll do the training? .....	7	ED
Requirements for elect. install.—quest. 1-8; Article 110 .....	16	QC
Protecting motors against running overcurrent—part 3 .....	30	MF
Demand control in energy management .....	38	WS
Contractor specializes in computer power .....	49	F
Facility noise control from the ground up .....	56	F
Protecting computers from transients .....	65	F
Power conditioning for automated manufacturing .....	74	F
A super job with super results .....	91	PM
Remanufactured transformers as an alternative solution .....	91	PM
Distribution of power enters a new age .....	96	PM
Hazardous-area lighting meets brewery needs .....	97	PM
Troubleshooting a flickering light circuit .....	102	RQ
Is this hazardous-area fitting safe? .....	110	RQ
Lighting fixtures at exit doors .....	114	CF
Wiring in air-handling spaces .....	114	CF
Neon lighting transformers .....	114	CF
Armored cable supplying fixtures .....	116	CF
Conductors to two motors .....	116	CF
Motor disconnects .....	118	CF
Evaluating project-management options .....	156	AI

### May

Specifications and the selection process .....	7	ED
Requirements for elect. install.—quest. 9-15; Article 110 .....	12	QC
Protecting motors against running overcurrent—part 4 .....	32	MF
Undercarpet wiring for dedicated and isolated ground circuits .....	38	WS
Guidelines for preparing equipment specifications .....	55	F
Pulsing transformers help lab reach for new frontiers .....	98	PM
HPS used for roadway lighting .....	101	PM

# EDITORIAL INDEX—1987

Article title	Pg.	Dept.	Article title	Pg.	Dept.
Lighting enhances church's appearance .....	106	PM	Motor lubrication guidelines .....	90	RQ
More on wiring 3-way switch circuits .....	110	RQ	Substation secondary protection .....	98	CF
Why do compressor motors keep burning out? .....	116	RQ	Grounded delta service .....	98	CF
Grounding an isolating transformer neutral .....	126	CF	EMT over 600V .....	104	CF
Neutral continuity in multiwire circuits .....	126	CF	Dishwasher wiring .....	105	CF
FLC of motors .....	132	CF	Number of conductors in a box .....	105	CF
Identifying basement GFCI .....	132	CF	Will there be consulting engineers in the year 2000? .....	140	AI
Multifamily dwelling panel bonding .....	138	CF			
Firestops should be detailed in specifications .....	194	AI			
			<b>September</b>		
<b>June</b>			The motor business is changing .....	7	ED
Automation and the electrical industry .....	7	ED	Grounded conductors—quest. 1-9; Article 200 .....	12	QC
Requirements for elect. install.—quest. 16-22; Article 110 .....	12	QC	Installing motor control centers .....	30	MF
Protecting motors against running overcurrent—part 5 .....	26	MF	Aging or failed bus insulation can be reinsulated .....	36	WS
Color-coding pilot devices .....	32	WS	Applying the adjustable-frequency drive .....	59	F
Centralizing the control of postal service conveyor systems .....	49	F	Total motor protection .....	68	F
Installing MAP broadband local area networks .....	60	F	Retrofitting HVAC motors requires careful planning .....	77	F
Grounding process-control computers .....	66	F	Unique helicopter-pad lights in Houston .....	85	PM
Using DC drives in automated cranes .....	74	F	HPS lighting brightens campus and saves energy .....	85	PM
Lighting control techniques reduce unnecessary energy use .....	81	F	Machine shop cuts energy costs with lighting system .....	88	PM
Automating electrogalvanizing line helps meet challenges .....	88	PM	Should receptacle ground slots be up or down? .....	92	RQ
Lighting system highlights chapel .....	92	PM	Transformer protection .....	102	CF
Automated facility .....	93	PM	GFCI in a repair shop .....	102	CF
Installing, protecting, and controlling PF capacitors .....	100	RQ	Service entrance for onsite generation .....	102	CF
Sizing standby generator loads .....	108	CF	Circuit breaker interchangeability .....	104	CF
Working space around transformers .....	108	CF	Parallel neutrals .....	105	CF
Box extension rings .....	110	CF	Feeder overcurrent protection .....	106	CF
Lighting branch circuits .....	110	CF	Firestop because it's required .....	138	AI
The state of industrial power distribution .....	148	AI			
			<b>October</b>		
<b>July</b>			Who is interested in tools? .....	7	ED
Swimming pool wiring—cutting through controversy .....	7	ED	Branch circuits—quest. 1-7; Article 210 .....	12	QC
Marinas and boatyards—quest. 1-7; Article 555 .....	12	QC	Maintaining motor control centers .....	26	MF
Effect of voltage variations on motors .....	24	MF	Detecting blown fuses .....	42	WS
Protecting electrical equipment against corrosion .....	32	WS	Installing temporary power for a construction site .....	53	F
Versatile power system serves lakeside marina .....	49	F	Bucket truck builds electrical contractor business .....	60	F
Remanufacturing saves navy dollars .....	84	PM	Infrared scanning added to routine maintenance .....	67	F
Scale model optimizes power plant design and construction .....	84	PM	Installing fiber optics: the tools & techniques .....	74	F
Floodlights satisfy needs at stadium .....	86	PM	Tooling up for high-voltage splices .....	81	F
More on compressor motor burnout .....	90	RQ	Discount broker prewires workstations .....	84	PM
Can PCB ballasts be thrown in garbage? .....	92	RQ	Fire detection for a highway tunnel .....	86	PM
Applying the NEC to telephone utilities .....	96	CF	Vibration switches protect pipeline .....	90	PM
Grounding metal siding .....	96	CF	Infrared sensors seek out hot spots .....	96	PM
Using nonmetallic-sheathed cable .....	96	CF	How does a DC clamp-on ammeter work? .....	104	RQ
Supplying portable test stands .....	98	CF	More on receptacle ground slots .....	104	RQ
Get the most out of your Yellow Pages advertising dollar .....	144	AI	How much does motor FLC change? .....	108	RQ
			Roof receptacle outlets .....	114	CF

## Articles by subject

### Automation and controls

Article title	Month	Pg.	Dept.	Article title	Month	Pg.	Dept.
Are zero-speed switches really necessary? .....	FEB	92	RQ	Specialty tools save time and money on retrofit project .....	DEC	70	F
Guidelines for preparing equipment specifications .....	MAY	55	F	Toxicity testing may change construction practices .....	DEC	142	AI
Automation and the electrical industry .....	JUN	7	ED				
Color-coding pilot devices .....	JUN	32	WS				
Centralizing the control of							
postal service conveyor systems .....	JUN	49	F				
Installing MAP broadband local area networks .....	JUN	60	F				
Grounding process-control computers .....	JUN	66	F				
Using DC drives in automated cranes .....	JUN	74	F				
Automating electrogalvanizing line							
helps meet challenges .....	JUN	88	PM				
Automated facility .....	JUN	93	PM				
Vibration switches protect pipeline .....	OCT	90	PM				
Making training as realistic as possible .....	OCT	156	AI				
Level controls cut downtime .....	NOV	96	PM				
Finding replacement semiconductors .....	DEC	77	F				
Low-voltage circuit classification .....	DEC	110	CF				

### Business

Telephone wiring in residential occupancies .....	MAR	69	F
Fire-alarm systems and the electrical contractor .....	MAR	138	AI
Contractor specializes in computer power .....	APR	49	F
Evaluating project-management options .....	APR	156	AI
Specifications and the selection process .....	MAY	7	ED
Firestops should be detailed in specifications .....	MAY	194	AI
Get the most out of your Yellow Pages			
advertising dollar .....	JUL	144	AI
It pays to know electrical testing .....	AUG	7	ED
Modern rewind methods assure better rebuilt motors .....	AUG	30	MF
Modern test techniques ensure power system reliability .....	AUG	53	F
Will there be consulting engineers in the year 2000? .....	AUG	140	AI
The motor business is changing .....	SEP	7	ED
Who is interested in tools? .....	OCT	7	ED
Bucket truck builds electrical contractor business .....	OCT	60	F
Tooling up for high-voltage splices .....	OCT	81	F
Modernization and renovation of electrical systems .....	DEC	7	ED
Life extension for electrical distribution systems .....	DEC	51	F

### Calculations and design

Protecting molded-case circuit breakers .....	MAR	76	F
Facility noise control from the ground up .....	APR	56	F
Neutral continuity in multiwire circuits .....	MAY	126	CF
FLC of motors .....	MAY	132	CF
Firestops should be detailed in specifications .....	MAY	194	AI
Scale model optimizes power plant			
design and construction .....	JUL	84	PM
Dishwasher wiring .....	AUG	104	CF
Number of conductors in a box .....	AUG	105	CF
Feeder overcurrent protection .....	SEP	106	CF
How much does motor FLC change? .....	OCT	108	RQ
Computer cable insulation makes a difference .....	DEC	38	WS
Low-voltage circuit classification .....	DEC	110	CF

### Computer power and conditioning

Contractor specializes in computer power .....	APR	49	F
Facility noise control from the ground up .....	APR	56	F
Power conditioning for automated manufacturing .....	APR	74	F
Centralizing the control of			
postal service conveyor systems .....	JUN	49	F
Grounding process-control computers .....	JUN	66	F
Monitoring power for a small computer .....	AUG	62	F
Discount broker prewires workstations .....	OCT	84	PM
Infrared sensors seek out hot spots .....	OCT	96	PM
Hotel cuts electricity costs .....	NOV	106	PM
Computer cable insulation makes a difference .....	DEC	38	WS

### Costs and energy conservation

Energy bills cut at SDSU library .....	JAN	93	PM
Lighting controls provide savings .....	JAN	96	PM
Hotel renovation chooses ceiling heat system .....	FEB	81	PM
